

Application Name	Kirkan Wind Farm, Aultguish, Garve
Planning Reference	19/01861/S36
Planning Case Officer	Simon Hindson
Date of Response	14/06/2019

Appendix 5.2 of the EIA provides a baseline of the historic environment within and around this application area. The document does not provide any recommendations for mitigation. I have assessed the document and can conclude that there is little potential for direct impacts from the proposed development. It is not considered that mitigation such as monitoring during construction is justified in this instance. No condition is therefore requested for this application.

Please let me know if you need any additional clarification at this stage.
