Subject: RE: Kirkan Wind Farm Additional Information

FAO Mark Ashton

Mark

Thank you for the opportunity to comment on the additional information submitted by Coriolis Energy in support of the Kirkan Wind Farm application. We note this information has been prepared in response to feedback from SEPA, and comprises hydrological and peat assessments as well as supplementary landscape assessments. Having reviewed this information, we note that this will not impact on the trunk road network, therefore, I can confirm that Transport Scotland's previous conclusions as presented in our letter of 30th May 2019 remain valid.

Regards.

Gerard
