**Kirkan wind farm**

To Whom It May Concern:

I would like to register my support for the Kirkan wind farm proposal. I understand that the scheme will deliver low cost, low carbon energy, as well as significant benefits to the community and region from funding, investment and employment. For the sake of future generations, we must act now to deliver the renewable energy capacity that we desperately need to meet our climate change commitments.

Yours faithfully,

Redacted

**Kirkan wind farm**

To Whom It May Concern:

Community energy self-sufficiency is important. There is too much emphasis on aesthetic emptiness currently. And I'm speaking as an outdoor type who loves wide open spaces. Communities need more than just tourist revenue if they are to truly thrive. Its all about balance.

Yours faithfully,
