**Kirkan wind farm**

To Whom It May Concern:

I would like to register my strong support for the Kirkan wind farm proposal. I understand that the scheme will deliver low cost, low carbon energy, as well as significant benefits to the community and region from funding, investment and employment. Having visited the area myself several times I feel that this is an appropriate setting for such an important project and will be of little detriment to the surrounding area both aesthetically and physically. With so many stunning locations and ecologically focussed projects in nearby areas this offers a sensible, balanced approach to the sustainable future generation of energy, harnessing a vital resource. For the sake of future generations, we must act now to deliver the renewable energy capacity that we desperately need to meet our climate change commitments.

Yours faithfully,
