Kirkan wind farm

To Whom It May Concern:

I would like to register my support for the Kirkan wind farm proposal. I understand that the scheme will deliver low cost, low carbon energy, as well as significant benefits to the community and region from funding, investment and employment. For the sake of future generations, we must act now to deliver the renewable energy capacity that we desperately need to meet our climate change commitments.

Yours faithfully,

Kirkan wind farm

To Whom It May Concern:

RJ McLeod would like to register our support for the Kirkan wind farm proposal. Renewable energy projects such as this, allow companies to maintain/increase employment levels and provide real jobs, training, and thus an economic benefit at a local level in areas which are often short of external investment and stimulus. A project the size of Kirkan has the potential to provide a very significant boost to the economy of the Highlands and Scotland as a whole; this is particularly the case during the construction period, not only in direct jobs but also in terms of the extensive and valuable supply chain of sub-contracted goods and services.
